

Battle Abbey School Bus Service

We have been working hard over the summer to make some changes to our Home to School transport services in order to upgrade to a safer, convenient and more advanced service for our families.

From September 2021, we have enhanced our home to school transport service with some innovative technology provided by Kura. The app has been developed and tested in partnership with schools, parents and students and allows parents to track their child or children's individual school routes, arrivals and departures, and view boarding and alighting updates in one place. If a child doesn't board, or if they alight at an unexpected stop, you, and the school will know about it. You can also cancel and book journeys in the app as long as this is done at least an hour before that journey is about to start, giving you full control of your child or children's travel schedule.
